

WEEKLY PROGRESS REPORT (WPR)

For the week commencing: 22/06/2026-28/06/2026

WPR :- 8

Enrolment Number: A41105224052

Program: B.Tech (CSE)

Student Name: Sanu kumar

Faculty Guide's Name: Kanta Prasad Sharma

Project Title: Artificial Intelligence In Everyday Life

TARGETS SET FOR THE WEEK:- The main target for the eighth week was to refine the project "Artificial Intelligence in Everyday Life" by improving the quality of the report and presentation. The objective was to review all project chapters, add recent examples and diagrams, verify references, and ensure that the documentation met academic standards. Another goal was to prepare for the final evaluation by improving presentation and communication skills.

ACHIEVEMENTS FOR THE WEEK:- During the eighth week, the project report was significantly improved through detailed review and editing. Additional real-world examples, diagrams, and case studies were incorporated to enhance the quality of the report. Formatting errors and grammatical mistakes were corrected, and references were verified. The project presentation was also updated with better visuals and organized content, making it more effective for the final evaluation.

FUTURE WORK PLANS-In the upcoming and final week, the complete project report and presentation will undergo one last review before submission. Final corrections, documentation checks, and presentation practice will be carried out to ensure that the project is accurate, professional, and ready for evaluation. The final week will also focus on summarizing the overall learning experience and completing all internship requirements..

WPR of Week 8th:- (22/06/2026-28/06/2026)

WPR's Remaining: - 1

Enrollment Number: - A41105224052

Programme: - B.Tech (CSE)

Term Paper Subject Area: - Artificial Intelligence In Everyday Life

Week's Summary

<u>Days/Time</u>	
<u>Monday</u>	Reviewed every chapter of the project report to identify areas that required improvement. Carefully checked the introduction, objectives, literature review, applications, advantages, challenges, future scope, and conclusion. Updated the content wherever necessary to improve clarity, accuracy, and logical flow. Collected additional information from reliable sources to strengthen the project.
<u>Tuesday</u>	Focused on improving the quality of the project report by adding recent examples, diagrams, tables, and case studies related to Artificial Intelligence in Everyday Life. Researched the latest developments in AI applications across healthcare, education, finance, transportation, and smart technologies. Organized the collected information into appropriate sections of the report.
<u>Wednesday</u>	Worked on formatting and editing the complete report. Corrected grammatical mistakes, improved sentence structure, verified references, and ensured consistency in headings, fonts, and page layout. Reviewed all diagrams and figures to ensure they were properly labeled and placed in the correct sections.
<u>Thursday</u>	Prepared the project presentation by refining slide content, adding visual illustrations, and simplifying technical concepts for better understanding. Practiced explaining each section of the project and ensured that the presentation clearly highlighted the objectives, methodology, findings, and future scope of Artificial Intelligence.
<u>Friday</u>	Conducted a comprehensive review of both the project report and presentation. Evaluated whether all project objectives had been achieved and identified minor improvements to be completed during the final week. Planned the remaining tasks, including final proofreading, presentation practice, and documentation review, to ensure the project would be ready for successful submission in the ninth week.
